Koriyama Geometry and Physics Day
24 February 2012
5F, Building 55, College of Engineering, Nihon University

11:00-11:40
Takashi Otofuji (Nihon University)
Introduction to quantum cohomology

11:50-12:30
Tadahito Nakajima (Nihon University)
Some aspects of holographic noncommutative QCD (1)

13:30-14:20
Tadahito Nakajima
Some aspects of holographic noncommutative QCD (2)

14:30-15:00
Hiraku Abe (Tokyo Metropolitan University)
What is a weighted Grassmannian?

15:20-15:50
John Alexander Cruz Morales (Tokyo Metropolitan University)
Laurent phenomenon in mirror symmetry

16:00-16:45
Martin Guest (Tokyo Metropolitan University)
Introduction to the article "On the classification of $N = 2$ supersymmetric theories" by Cecotti and Vafa

17:00-17:45
Ping Li (Tokyo Metropolitan University)
Some applications of Hirzebruch $\chi_y$ genus
